CAREER OBJECTIVE

Third-year Computer Science student passionate about AI, Machine Learning, and Full-Stack Development. Experienced in building MERN applications and ML projects through internships and hackathons. Seeking internship opportunities where I can build impactful products while growing as an AI Engineer.

Education

B.E Computer Science And Engineering

- Annamalai university , Cuddalore | 2024 - 2028

Technical Skills

AI & Data Science	Programming Languages	Database	Backend Technologies	Frontend Technologies
- Machine Learning - Deep learning - Data Analytics - NumPy - Pandas - Matplotlib - Scikit-learn - TensorFlow - PyTorch	- Python - Java - R programming - JavaScript	- MongoDB - SQL Big Data - Hadoop - Apache Spark	- Node.js - Express.js - FastAPI - Postman - ThunderClient	- React.js - Bootstrap - HTML CSS JavaScript Mobile Development - React Native - Android Studio

Experience

- Full Stack Development Intern | Company : Artifai Tech |30 June - 07 July
 - Gained hands-on exposure to full stack development concepts
 - Worked on basic frontend and backend functionalities Learned application structure, data flow, and integration concepts Demonstrated strong enthusiasm, dedication, and willingness to learn during the internship
- Web Development Intern | Company : Elevate Labs | 04 Aug - 20 Sep
 - Contributed to real-world web development projects as part of the internship program
 - Developed and maintained responsive web pages using HTML, CSS, JavaScript, and React
 - Assisted in implementing application features and fixing bugs
 - Collaborated with the team to deliver tasks within deadlines
 - Recognized as Best Performer for strong performance, dedication, and problem-solving skills
- MERN Stack Development Intern| Company : Codec Technologies,Hybrid |15 Dec - 15 Jan
 - Working on MERN stack-based application development tasks
 - Developing and integrating frontend components using React
 - Assisting in backend development with Node.js, Express.js, and MongoDB
 - Learning real-world project workflows and industry best practices
 - Collaborating with assigned project heads to complete tasks on time

Languages

- Tamil
- English

Projects

ZENVYLANCE – AI-POWERED FREELANCE ECOSYSTEM

MERN Stack | React.js | Node.js | Express.js | MongoDB | AI Integration

- Developed a full-stack SaaS platform connecting freelancers and clients through an AI-powered project marketplace.
- Built secure user authentication, project posting, proposal submission, and freelancer profile management using the MERN stack.
- Designed an AI Validation Score system to help assess project and freelancer credibility.
- Integrated smart freelancer matching to improve project recommendations based on skills and requirements.
- Planned a secure escrow payment workflow for safe client-freelancer transactions.
- Developed responsive UI components and REST APIs for seamless frontend-backend communication.

STUDENT PERFORMANCE PREDICTION

Python | Scikit-learn | Pandas | NumPy | Matplotlib

- Built a Machine Learning model to predict student performance using academic and attendance data.
- Performed data cleaning and preprocessing using Pandas and NumPy.
- Trained and evaluated classification models with Scikit-learn.
- Visualized insights and model performance using Matplotlib.
- Improved understanding of data preprocessing, feature selection, and model evaluation.

MOBILE AUTOMATION AI AGENT

AI-Powered Mobile Automation | Kotlin | Android Studio | Python | Accessibility Services

- Developed an AI-powered mobile automation assistant that executes smartphone tasks through natural language voice or text commands.
- Designed an intelligent workflow where the AI interprets user intent, generates action sequences, and automates app interactions using Android Accessibility Services.
- Built a React Native interface for voice and text input with real-time task execution feedback.
- Integrated a Node.js backend and Python-based AI logic for intent processing and automation workflow management.
- Focused on real-world use cases such as app navigation, form filling, reminders, and task automation while reducing manual user interaction.

Leadership

TECHNICAL SECRETARY | IEI STUDENTS' CHAPTER, DEPARTMENT OF CSE

- Coordinated technical events and workshops to promote student participation and technical learning.
- Collaborated with the executive committee to plan and execute chapter activities effectively.

TEAM LEADER – LOGIC LORDS | AURISTRA'S 2026 HACKATHON

- Led the Logic Lords team during the Auristra's 2026 Hackathon, coordinating idea development, task allocation, and project execution.
- Guided the team in developing an AI-based solution, ensuring effective collaboration and timely submission under hackathon deadlines.

Certifications

Generative AI – Google Cloud

Frontend Development – Simplilearn

Full Stack Developer Course – Simplilearn

React Project Bootcamp – SkillEcted by JSSAV Edu Pvt. Ltd.
